浙江银丰自动化科技有限公司

ZHEJIANG YINFENG AUTOMATION TECHNOLOGY CO.,LTD.

中国·浙江

关于我们 About use

浙江银丰自动化科技设备有限公司是专业从事电脑数控弹簧机械及其周边设备研发、设计和销售的高新科技企业，具有二十年的生产历史。我们所有系统和伺服电机均引进日本、台湾的成熟科技制造以及直接使用其相关配套产品。我公司设备具有送线精密高、成型动作稳定、准确、外观新颖宜人等特点，深受广大客户的青睐，设备连续多年销量位居行业前茅。

我们现有YF-8322、YF-8335、YF-8345、YF-8545、YF-8350、YF-8560、八爪凸轮弹簧机YF-8208、YF-8212、YF-8508、YF-8512、YF-8320、YF-8330、YF-8620、YF-8630、YF-8645、YF-8660、YF-8680、YF-86100、YF-86120电脑压簧机，YF-1026、YF-1225、YF-1245、YF-1260、YF-1280、YF-12100无凸轮电脑弹簧机，YF-4-80、7-80、7-12-3D钢丝线材成型机、YF-822、YF-835电脑螺套机。

我们的设备适合众多行业的需求，生产电子、玩具、电器、运动器材、汽车、文具、仪器、仪表、发饰、工艺品等所需的各类高精密的弹簧，还可生产不同规格的板材弹片、发条等。在未来竞争日益激烈的市场中，银丰将一如既往的秉持：

“科技为先，以质取胜，服务贴心”，“开拓创新，追求卓越”的宗旨，为弹簧业界客户提供品质稳定，价格相宜的弹簧生产专用设备。

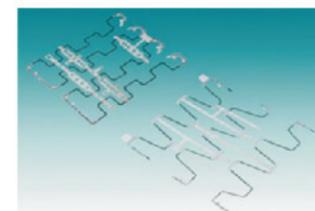

我们的目标

制造和服务符合客户品质技术需求的弹簧机械，担当弹簧业界的弹簧生产制造的伙伴，我们全体同仁将会持续研发制造更精良的弹簧机械，以及提供更方便有效率的技术咨询和完善的售后服务。

Zhejiang Yinfeng Automation Technology Equipment Co., Ltd. is a high-tech enterprise specialized in CNC spring machinery and assorted equipment research and development, design and marketing, has two decades of production history. All our systems and servo motors were introduced mature technology manufacturing and direct use of its related products from Japan and Taiwan. The equipment of the company has high-precision wires feed, molding action stability, novel and pleasant appearance and other features, favored by the majority of customers, the equipments are in the industry forefront for continuous many years.

Now, we have YF-8322, YF-8335, YF-8345, YF-8545, YF-8350, YF-8560, 8-claw cam spring machine, YF-8208, YF-8212, YF-8508, YF-8512, YF-8320, YF-8330, YF-8620, YF-8630, YF-8645, YF-8660, YF-8680, YF-86100, YF-86120 computer compressed spring, YF-1026, YF-1225, YF-1245, YF-1260, YF-1280, YF-12100 cam-free computer spring machine, YF-4-80, 7-80, 7-12-3D steel wire molding machine, YF-822, YF-835 PC screw machine.

Our equipments are suitable for many industries needs, manufacturing high precision of the spring need by electronics, toys, electrical appliances, sports equipments, cars, stationeries, apparatus, instruments, hair ornaments, crafts and others, and can manufacturing different specifications of sheet shrapnel , spring and so on. In the future in an increasingly competitive market, Yinfeng will continue to adhering to the objectives: “led by science, strategy of success through quality, caring service”, “exploration and innovation, to pursuit of excellence”, to provide stable quality, price favorable of spring production special equipment for spring industry customers.

Our goals

To manufacturing and servicing spring machinery meet customer demand for quality technology, take on spring manufacturing industry partner, we all will continue to develop more sophisticated machinery, and to provide more convenient and efficient technical advice and perfect after-sales service.

10-12轴无凸轮弹簧机系列

产品简介:

多轴数控弹簧机可生产（0.2-10.0mm线径）无凸轮转线弹簧机采用独特的无凸轮和无摇臂设计，由多组伺服马达独立控制，每个工位上都有单独伺服驱动，卷曲功能具有可拆卸式安装功能，对于折角处理和圆弧折弯具有较快的处理速度，转线系统功能，解决了弹簧机在送线过程中整个送线可正反向360度旋转，实现了多角度成型和切断等，为方便完成您所要求的各类形弹簧试样及生产，在工作过程中并设有精度检测跟踪装置，保证弹簧品质优良，可生产各种各样异型弹簧、压簧、双扭簧、电池簧、扁簧（发条簧）及各种线成型等，精密准确、调机快速、稳定可靠是用户的理想设备。

Product Introduction:

The Multiple axes CNC spring machine can be produced (0.2-10.0mm wire diameter). The camless wire spring machine adopts a unique camless and rockerless design, which is independently controlled by multiple sets of servo motors, and each station has a separate servo drive.

The crimping function has a detachable installation function, which has a faster processing speed for corner processing and arc bending. wire transfer system solves the fact that the entire wire feed of the spring machine can be rotated 360 degrees in the forward and reverse directions during the wire feed process. Achieve Multiple angle forming and cutting, etc., in order to facilitate the completion of the various types of spring samples and production you require.

Wide range of applications: electronics, toys, electrical appliances, sports equipment, cars, tableware, supermarkets, stationery, apparatus, instruments, hair ornaments, crafts and so on.

2-6轴压簧机系列

产品简介:

多轴数控压簧机可生产（0.15-12.0mm线径）本机拥有传统机械压簧机的特点，配备现代化电脑控制伺服系统的高速与精确，系统备置电脑，可储存上百个工作程序，各轴的位置、送线资料、生产速度、生产数量都是显示在屏幕上，程序资料很容易在键盘上设定及改变，间距调节方便灵活，外径轴独立，可通过设定程序轻松调整外径大小，压簧机无需调整机械部分即可生产任意形状压缩弹簧，完全避免了更换凸轮片的麻烦，调节及为方便。适用于各式压缩弹簧、油封弹簧、宝塔簧、波形弹簧、汽车弹簧等

Product introduction:

Multiple axes CNC spring compression machine can be produced (0.15-12.0mm wire diameter). This machine has the characteristics of traditional mechanical spring compression machine. It is equipped with modern computer-controlled servo system with high speed and accuracy.

The system is equipped with a computer and can store hundreds of work programs. , The position of each axis, wire feed information, production speed, production quantity are displayed on the screen, the program information is easy to set and change on the keyboard, the pitch adjustment is convenient and flexible, the outer diameter axis is independent, and can be easily set by the program Adjust the size of the outer diameter, the compression spring machine can produce any shape of compression spring without adjusting the mechanical part, completely avoid the trouble of replacing the cam piece, adjustment and convenience.

Suitable for all kinds of compression springs, oil seal springs, pagoda springs, wave springs, clockwork spring, and various special-shaped springs, complex and difficult spring,etc.

凸轮弹簧机系列

凸轮数控弹簧机可生产（0.2-6.0mm线径），转线弹簧机是在传统带凸轮万能弹簧机（八爪弹簧机）的基础上不断发展起来的，常规三轴八爪机有送线轴、凸轮轴、转芯轴，为了方便复杂一下弹簧的形成加工，本公司开发了卷曲功能跟转线系统功能。卷曲功能具有可拆卸式安装功能，对于折角处理和圆弧折弯具有较快的处理速度，转线系统功能，解决了弹簧机在送线过程中整个送线可正反向360度旋转，实现了多角度成型和切断等，还提升了机台的工作效率，调试更加方便、成形更加简单、操作更加便利，功能更加强大，适用于生产双扭簧、直形簧，宝塔簧、拉簧、矩形簧线材成型、钢皮涡簧、发条及各花式簧、复杂高难度异型簧等。

The cam CNC spring machine can be produced (0.2-6.0mm wire diameter). The wire-turning spring machine is continuously developed on the basis of the traditional universal spring machine with cam (eight-jaw spring machine). The conventional three-axis eight-jaw machine has a wire feed shaft. In order to make the formation and processing of springs more convenient and more complicated, the company has developed the curling function and the function of the spinning system.

The crimp function has a detachable installation function, which has a faster processing speed for corner processing and arc bending. The function of the wire transfer system solves the problem that the entire wire feed of the spring machine can be rotated 360 degrees in the forward and reverse directions during the wire feed process.

Multiple angle forming and cutting, also improve the working efficiency of the machine, more convenient debugging, simpler forming, more convenient operation, more powerful functions. Suitable for the production of double torsion springs, straight springs, pagoda springs, tension springs, Rectangular spring wire forming, steel skin vortex spring, spring and various fancy springs, complicated and difficult shaped springs, etc.

线材成型机系列

平面线材成型机可生产（2.0-12.0mm线径），本机采用线材成型机专用电脑控制系统，进口高精度伺服电机。电脑为中文介面，易操作、定准准确，可以存储上百种规格不同的加工程序，为下次调试缩短时间，根据荧光屏的工作情况，可以随时对产品的外径角度等进行修正，当无线、断线、缠线时自动停机设计及线架自动加速功能，令生产更轻松有效。适用于生产：汽车座椅悬架弹簧、遮阳板骨架、汽车门锁拉杆、工艺品金属线、洁具餐具支架、仓储笼、购物手推车等线材成型设备。

The flat wire forming machine 3D or 2D can be produced (2.0-12.0mm wire diameter). This machine adopts a special computer control system for wire forming machine and imported high-precision servo motor. The computer is Chinese-language interface, easy to operate, accurate and accurate. It can store hundreds of processing programs with different specifications, shorten the time for the next debugging, according to the working conditions of the fluorescent screen, you can modify the outer diameter angle of the product at any time. The design of automatic shutdown when the thread is broken or tangled and the automatic acceleration function of the thread stand make the production easier and more effective. Applicable to production: wire forming equipment for car seat suspension springs, sun visor skeletons, car door lock levers, handicraft metal wires, sanitary ware tableware supports, storage cages, shopping trolleys and other wire rods.
